REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of latch mechanism having a cam fixed on a base member, and having a projection with a heart shape and a swing groove around the projection, a swing member provided on a moveable member, and having a tip and a pin close to the tip for tracing the swing groove, and a spring member provided on the base member where the spring member is located adjacent the cam and contacting the tip when the swing member is moved close to the projection, to urge the swing member from one side of the projection toward the other side to urge the swing member from one side of the projection toward the other side.

The closest prior art of record, U.S. Patent Number 3,156,493 to Griffiths, discloses latch mechanism having a cam fixed on a base member, and having a heart shaped projection and a swing groove around the projection, a swing member provided on a moveable member, and having a tip and a pin close to the tip for tracing the swing groove, and a spring member. However, Griffiths does not disclose the spring member being provided on the base member where the spring member is located adjacent the cam and contacting the tip when the swing member is moved close to the projection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
